SUMMARY

I am a results-driven frontend Software Developer with a solid foundation in frontend development and technical problem-solving. I hold a diploma in Software Engineering from AltSchool Africa and specialize in Javascript and TypeScript as my primary programming languages. I have hands on experience building responsive, accessible, and user centric web applications using modern frameworks and tools, including but not limited to: React, NextJs, and Tailwind. I am passionate about crafting intuitive digital experiences and writing clean, maintainable code that scales. I am currently seeking opportunities in Frontend Development where I can contribute, learn, and grow while delivering impactful solutions.

SKILLS

- HTML 5
- CSS 3
- ReactJS
- NextJS
- JavaScript
- TypeScript
- VueJS
- TailwindCSS
- SCSS/Sass
- Python

WORK EXPERIENCE

NanleTech

Frontend Developer intern • March 2025 - September 2025

- I used Javascript and Typescript alongside other frameworks to convert Figma designs and Implement all web flow logic.
- Worked closely with backend engineers to implement APIs to align with the user flow from Figma on the web application.
- Participate in version control workflows, ensuring code quality and smooth collaboration across the development team.
- Developed the company's new website design using NextJS, TypeScript and Style module, and implemented translations to 3 Languages.

HerStories Africa

Fullstack Developer - May 2025 – Present (Ongoing)

- Initiated and currently building a web-based platform dedicated to preserving and showcasing the history of African Women
- Using NextJS and Tailwind to convert the figma design to a visually appealing and functional web application.
- Using Python and FastAPI for the backend database logic, to store different biographies.
- Implemented a 3D design of a virtual hall of fame using React 3D.

NSIA /MedServe (Nigeria Sovereign Investment Authority Medical Services)

NYSC, IT Support (January - November 2025)

- Provided first-line technical support to staff, resolving hardware, software, and network-related issues on-site.
- Assisted with onboarding of new staff by setting up workstations, user accounts, email access, and required applications.
- Assisted in diagnosing and troubleshooting common IT issues including system errors, connectivity problems, printer faults
- Assisted in inventory management of IT equipment, including tracking, basic configuration, and maintenance of devices.
- Supported staff with the use of office productivity tools, internal systems, and basic digital security best practices.
